Bagong Kalsada, Calamba City

Skills and Competencies

Front-End Development

- Programming Languages: HTML, CSS, JavaScript (core knowledge for building responsive and interactive web pages)
- Understanding of basic front-end frameworks and libraries (e.g., React, Bootstrap) – in progress
- Ability to translate design mockups into functional web interfaces
- Version control basics (Git/GitHub) for managing code efficiently
- Problem-solving and debugging skills in web development
- Strong willingness to learn and adapt to new front-end technologies

Technical Support & Computer Literacy

- Proficient in troubleshooting hardware and software issues, including desktops, laptops, and peripheral devices.
- Skilled in installing, configuring, and maintaining Windows operating systems and standard office applications
- Experienced with remote support tools for efficient issue resolution (e.g., AnyDesk, TeamViewer)
- Knowledge of basic programming concepts and scripting for automating repetitive tasks

Attention to Details

- Reviews work to ensure it meets required standards.
- Recognizes errors and finds ways to correct them.
- Maintains quality and accuracy in all assigned work.
- Identifies small errors and inconsistencies.
- Ensures that work is completed correctly with minimal mistakes.

Problem-Solving & Analytical Thinking

- Skilled in identifying root causes of technical issues and implementing practical solutions
- Ability to prioritize tasks and handle multiple support requests efficiently under tight deadlines
- Capable of applying logical reasoning to troubleshoot both software and hardware challenges

Teamwork & Professional Skills

- Collaborates effectively with colleagues, IT teams, and management to ensure smooth operations
- Demonstrates a proactive and dependable work ethic, ensuring tasks are completed with accuracy
- Strong attention to detail and organizational skills for maintaining system integrity and compliance
